

To set up the Centre system for Carnival management, you need to attach a new database to the Club Centre system.

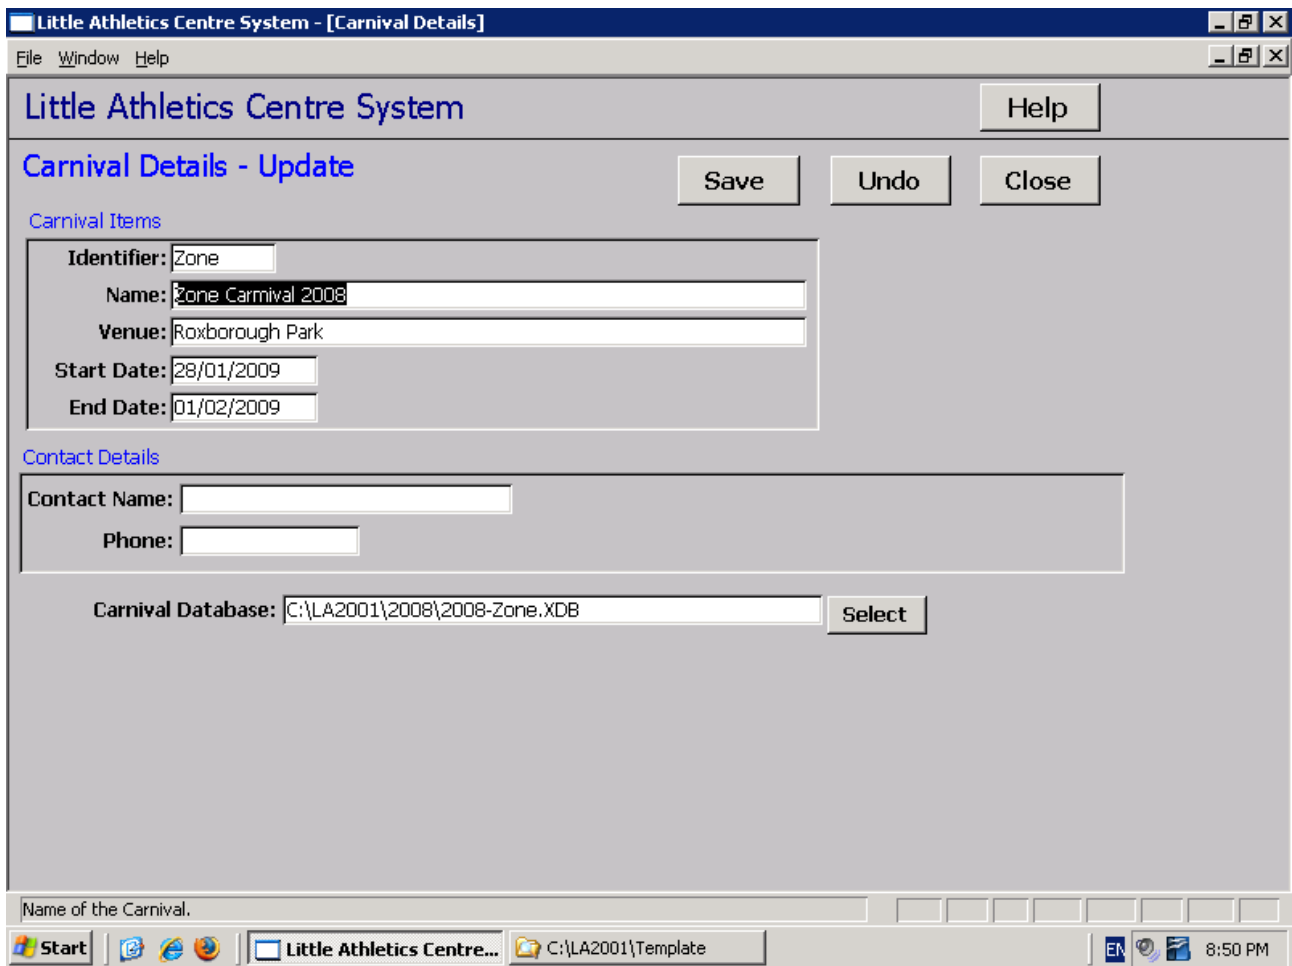

The Carnival Module is saved as an XDB database, and you should find a template / blank Database in your centre system files.

I create a copy of this file in the same directory as the current years Season Database (SDB).

Once you have a new database to use for the year, run Wardels, Go into the Carnivals Section.

Create a new carnival for Zone 2008.

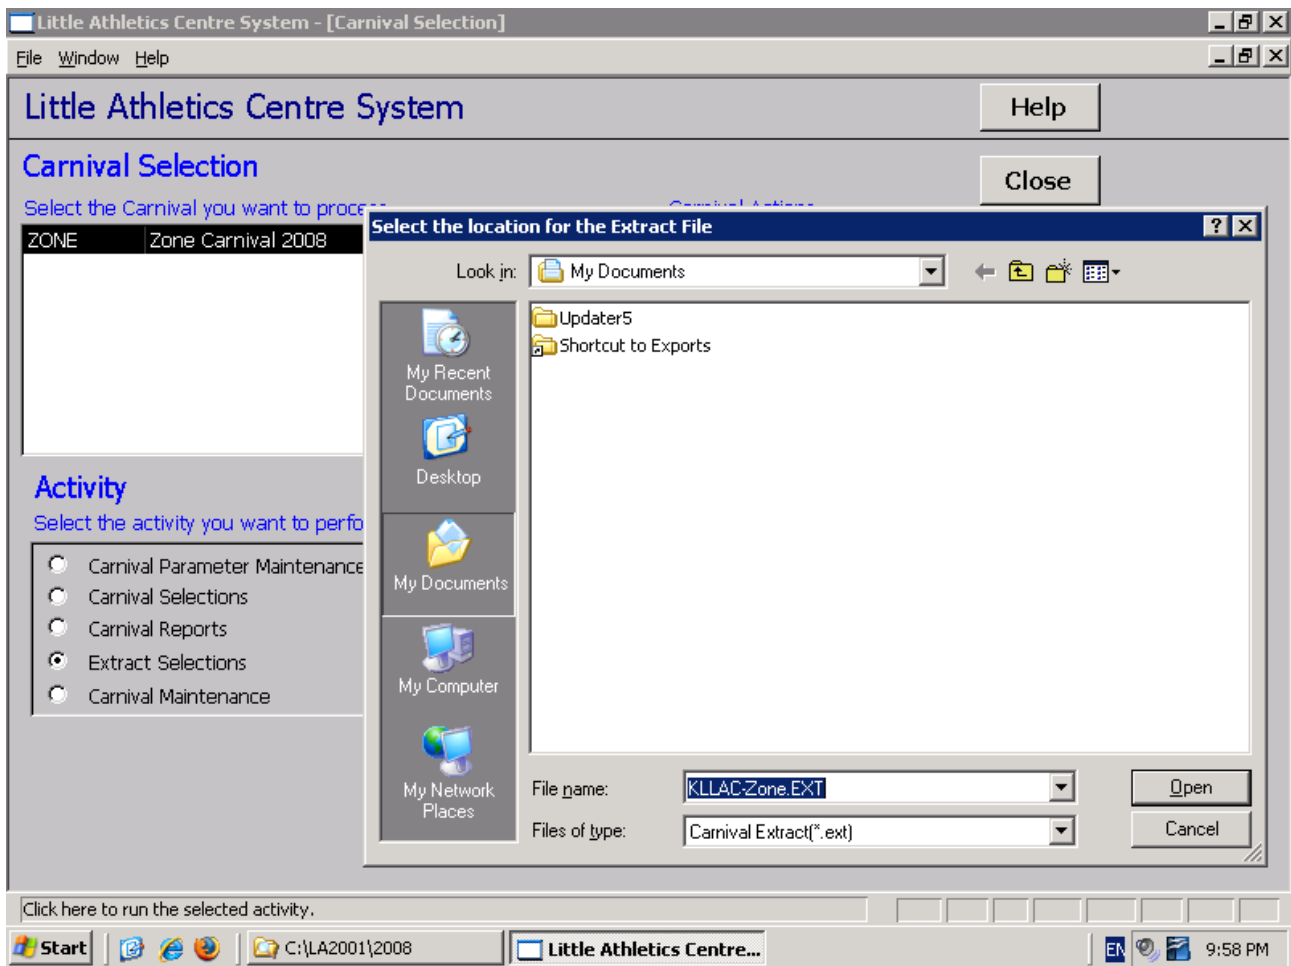

Go into “Carnival Setup” - “Parameters” and you need to setup the system as a “Standard”, and to allow 4 events per athlete, and 5 entries per event.

For Each Age group in the centre system, Select the events that we all compete in at Zone. Do not forget the U17 Boys run 110M Hurdles, and the girls have a 100M hurdles. You will need to setup these events in your centre system if you have not already done so.

Once you have the Carnival Database setup correctly, you can then Goto “Carnival Selections”, and Select the athletes and which events they are entering. Validate and save these on your system.

Once your Athlete and event selections have been completed, “Extract Selections”, to create an output file to be sent to the Zone computer officer as your club Zone entries.

Once the Zone Officer has received the file it is a simple matter to Import this file directly into the Zone System. This will negate the problems of data entry with misspelt names and entries and Save Many hours of manually reentering Data

If you do not wish to use you Club Wardle system, you will need to Create the export file directly using a text editor. The format of which is shown below. If using a Word processor, make sure you save the file as a "Plain text" file while saving the file.

Example of a Centre Ssystem Export file

```
"C 53","Kings Langley Little A's","KLLAC"  
"D001","50M Run","50M"

```

In the example above, The first line is your centre details. This must be the Centre Number and Name

The next section is your centre Events and the corresponding Event numbers.

the Athlete Section is the "D999 ","", ""

Centre Number, Athlete Number, Age Group, Surname, First name, Number of events"
a single line each for each event. Starting with E

E Centre Number, Athlete Number, Age Group, Event Number, Best result"
